Ms Bergen

Please consider these comments and documents for your WDRs for Nursery Products LLC or any other Nursery Products or sewage sludge permits:

1. Pictures from the Legal paperwork in the City of Adelanto VS Nursery Products LLC. Shows wastewater spilling onto roadway and public streets. This was a much smaller facility than proposed for Hinkley. Did NPLLC have the same standards than as being placed on them now? Did they violate Lahonton permits in Adelanto? Did Bio-Gro also violate Lahonton permits in Antelope Acres in the late 1990's? Shouldn't this material be handled indoors to better contain the potential problems? The Hinkley facility is expecting 100 trucks a day on unpaved roads without truck washing facilities.
- 2.and 3. Legal documents from Adelanto showing violations and history of non-compliance and lack of regard of conditions set forth by permitting agencies. 2005

Norman
